LabLink Configuration
Deployment Environment
dev (local, no S3)
test (S3, auto-deploy)
prod (S3, manual)
ci-test (CI testing)
SSL/Network Strategy
Development
Production
Production
Enterprise
none (HTTP:80 → 5000)
letsencrypt (Caddy auto-SSL)
cloudflare (CF proxy)
acm (AWS ALB + cert)
requires: certificate_arn Route53
Compute Configuration
GPU Instances
g4dn.xlarge (1 GPU)
p3.8xlarge (4 GPUs, high-perf)
other GPU types
gpu_support: true (auto-detected)
CPU Instances
t3.medium
t3.large
other CPU types
gpu_support: false (auto-detected)
Application Settings
SLEAP .slp files sleap-tutorial-data
Custom App custom extension custom repo
Scaling & Reliability
instance_count (1-N VMs)
startup_on_error (continue | fail)
AWS Infrastructure
region (us-west-2, us-east-1, ...)
client_ami_id (AMI selection)
image_name (Docker image)
EIP strategy (persistent | dynamic)
Authentication & Security
admin credentials (username, password)
database_password (PostgreSQL)
AWS credentials (access_key, secret_key)
Security groups (HTTP, SSH, ALB)
Monitoring & Logging
cloud_init_output_log_group (CloudWatch)
Log retention policy
Lambda log processor
Polling intervals (GPU: 20s, usage: 20s)
