LabLink Configuration
Deployment Environment
Options: dev | test | prod | ci-test
SSL/Network Strategy
Options: none | letsencrypt | cloudflare | acm*
*requires ACM cert + Route53
Compute Configuration
GPU: g4dn.xlarge | p3.8xlarge | ...
CPU: t3.medium | t3.large | ...
Application Settings
Software: SLEAP | Custom
Files: .slp | .h5 | custom
Repository: Git URL
Scaling & Reliability
Instance count: 1-N VMs
Error handling: continue | fail
AWS Infrastructure
Region, AMI, Docker image
EIP strategy
Authentication & Security
Admin credentials, DB password
AWS credentials, Security groups
Monitoring & Logging
CloudWatch logs, Lambda processor
Polling: GPU (20s), usage (20s)
